LI'S LEADER IN NO-DIG TRENCHLESS SOLUTIONS

MODERN PLUMBING SOLUTIONS FOR YOUR HOME TRENCHLESS PIPE LINING & PIPE BURSTING FROM ALLIED/ALL CITY

WELCOME TO THE FUTURE OF PLUMBING!

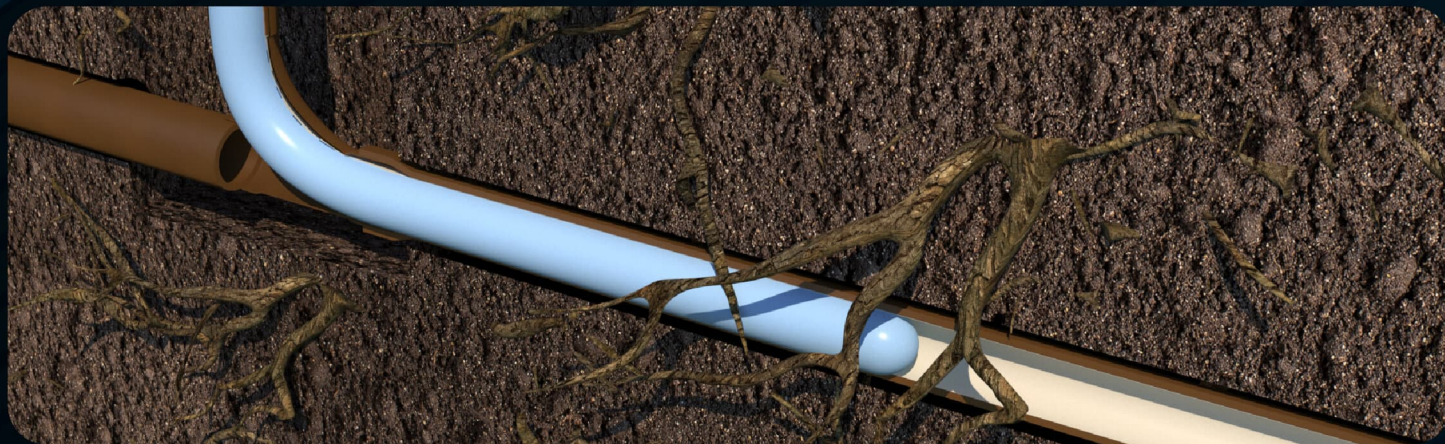

In today's fast-paced world, homeowners seek efficient and non-disruptive solutions for their plumbing needs. Say goodbye to traditional, invasive pipe replacement methods and welcome trenchless pipe lining and pipe bursting — the cutting-edge technologies that revolutionize the way pipe damage is resolved.

CALL US: 631-957-5023

TRENCHLESS PIPE LINING: THE SEAMLESS SOLUTION

Trenchless pipe lining is a minimally invasive method that repairs damaged pipes without the need for extensive excavation. This innovative technique involves inserting a liner coated with a durable resin into the existing pipe. The resin hardens, creating a seamless and long-lasting inner pipe that restores functionality without the disruption caused by traditional digging.

- ✓ **Minimally invasive:** No extensive digging or disruption to landscaping.
- ✓ **Cost-effective:** Saves on labor and restoration costs.
- ✓ **Durable and long-lasting:** Resistant to corrosion and root intrusion.
- ✓ **Environmentally friendly:** Reduces the need for extensive excavation and material usage.

TRENCHLESS PIPE BURSTING: SWIFT & EFFICIENT REPLACEMENT

Pipe bursting is a minimally invasive method to replace old or damaged pipes by fragmenting the existing pipe while simultaneously pulling the new pipe into place. This technique requires minimal excavation, making it an ideal choice for homeowners looking for a quick and efficient pipe replacement solution.

- ✓ **Minimal disruption:** Reduces the need for extensive digging & property disturbance.
- ✓ **Efficient and swift:** Replacement of pipes is completed relatively quickly compared to traditional methods.
- ✓ **Enhanced flow capacity:** Upgraded pipes improve water flow and system efficiency.
- ✓ **Durable & reliable:** New pipes are resistant to root intrusion & corrosion.
